EOS Names Axiomatek as New Distribution Partner to Meet Rising Demand for Industrial 3D Printing Across Mexico

Axiomatek partnership strengthens regional focus on powder bed fusion 3D printing technology and expertise

NOVI, Michigan, September 23, 2026 – EOS, a global technology leader in industrial 3D printing, today announced [Axiomatek](#) as its chosen distribution partner for Mexico, expanding access to EOS' industrial polymer and metal additive manufacturing (AM) solutions within one of North America's fastest-growing manufacturing markets.

Headquartered in Apodaca, Nuevo León, Axiomatek provides industrial equipment, automation systems, and manufacturing technologies to customers across automotive, aerospace, industrial automation, and general manufacturing sectors. Through the partnership, Axiomatek will offer EOS' complete portfolio of polymer and metal Laser Powder Bed Fusion (LPBF) systems, helping manufacturers across all industries adopt AM for R&D, prototyping, and production applications.

As organizations throughout Mexico continue investing in advanced production technologies, EOS is expanding its regional presence to meet those requests and provide greater local support, technical expertise, and access to proven industrial 3D printing solutions. The partnership reflects growing demand for industrial AM technologies that enable increased flexibility, reduced lead times, and more resilient manufacturing operations.

"Additive manufacturing is gaining real traction in Mexico as more industries understand where it delivers value," said Alejandro Hinojosa, Director of Operations. "Our partnership with EOS brings that expertise and technology directly to Mexican manufacturers, and we believe this is only the beginning of what AM can do for a country built on manufacturing."

"As AM has become increasingly integral within mainstream production environments, local expertise becomes critical," said Andrew Snow, senior vice president at EOS North America. "With their inherent AM expertise and broad in-

country reach, Axiomatek is perfectly positioned to help manufacturers in Mexico identify and implement applications where industrial 3D printing can deliver meaningful business value.”

About EOS

[EOS](#) provides responsible manufacturing solutions via industrial 3D printing technologies to organizations around the world. Since 1989, EOS has shaped the future of manufacturing by enabling its customers to innovate and differentiate through expert guidance, technology and services, leveraging its end-to-end additive manufacturing (AM) industry partnerships. From strategy to education to production, EOS is the leading global partner for both metal and polymer AM solutions, accelerating time-to-market for its customers through high-quality production efficiencies and sustainable solutions.

About Axiomatek

Founded in 2002 and headquartered in Apodaca, Nuevo León, Mexico, Axiomatek is an industrial equipment distributor and systems integrator serving manufacturers across Mexico. The company specializes in solutions for plastics manufacturing and injection molding, providing equipment, automation and auxiliary systems, as well as installation, technical service, spare parts, reengineering and turnkey manufacturing projects. Axiomatek’s portfolio also includes industrial 3D printing, machine vision and advanced manufacturing process automation solutions.
