

ADDITIVEMINDS
EXCELLENCE IN INDUSTRIAL 3D PRINTING

Your transformation to AM success
We enable your people

e-Manufacturing Solutions

Industrial 3D printing is about to enter serial mass production. But to become the next additive manufacturing champion, organisations need to minimise their investment risk and gain competitive advantage.

This can be achieved faster by going through an AM transformation, supported by Additive Minds:

- 1** Additive Minds supports and enables AM success along each customer's roadmap
- 2** We transfer expertise in a rapid and pragmatic manner
- 3** Training is provided by our large, reliable network of AM experts
- 4** AM enablement programmes are customised to your specific needs
- 5** Tangible results delivered in short time frames

Our services:

Consulting, Innovation Centre, Academy

Thought leadership that puts you first

Additive Minds

Additive manufacturing has come a long way since Dr Hans Langer, our first additive mind, founded EOS in 1989. Today, additive manufacturing (AM) is about a lot more than rapid prototyping. It has graduated to industrial production, offering manufacturers a spectrum of exciting new opportunities limited only by the imagination.

And not a moment too soon: Organisations around the world are under increasing pressure to innovate faster and better than competitors. Even so, they are sometimes slow to adopt AM because the necessary expertise is hard to find and this translates to potential investment risk.

Additive Minds solves these problems and enables your organisation to enjoy the full potential of AM by giving you all the know-how you need to outperform competitors. We can transfer the necessary expertise wherever you need it, whenever you need it. Fast.

EOS is a full solution provider of industrial 3D printing. And as a division of the market leader, Additive Minds has access to the largest pool of experience and expertise.

No other company in the AM market has a consulting and education portfolio that compares with ours. We lead in terms of breadth, depth and quality, whether assisting you in developing AM applications, entering serial production, or optimising innovation: This is Additive Minds.

Additive Manufacturing transformation journey

We enable your organisation to master the transformation

4 key transformation phases

- 1** Achieve AM Readiness
- 2** Develop your AM Application
- 3** Ramp-up your AM Production
- 4** Qualify, Rollout & Scale your Production

Enable your people faster and better to become the next industry champions

Face lack of competence in additive manufacturing in your existing organization

Gain competitive advantage through additive manufacturing

Accept economical pressure as a challenge for faster innovation

Expand your competitive advantage as AM champion!

With Additive Minds:
Consulting Services
Innovation Centres
Academy

Supporting you every step of the way

Our Consulting Services

Wherever your organisation finds itself in the AM implementation process our consultants stand ready to support it. They can assist you in understanding any aspect of AM and help you discover how best to make it work in developing applications, ramping up production, or ensuring quality.

Consulting Services

Let's take your manufacturing to the next level!

We assist in identifying where you have the greatest opportunities on this AM roadmap and then accompany you on your journey to significantly improved production.

Keeping your organisation ahead

AM Innovation Centres

Our 3- to 18-month Innovation Centre Programmes make it possible for large concerns to acquire AM expertise at EOS, within their region or to implement an 'AM Centre of Excellence' inside their own organisation. This enables them to develop AM applications with minimum risk and maximum potential in the shortest possible time.

We invite you to take advantage of our customised Innovation Centre Programmes – backed by the know-how of our industry experts – and become an industry leader in AM Innovation.

Benefit from one dedicated AM specialist as single point of contact throughout the whole project.

Innovation Centre Programmes

Choose the right one to drive your organisation forward:

Your key benefits	Location	Access to know-how	Single Point of Contact
Intense enablement to develop and produce innovative serial applications	EOS Headquarter	Closest possible access to EOS know-how and expertise	Additive Manufacturing Expert
Intense enablement to develop and produce innovative serial applications	In your region	Access to regional EOS know-how and expertise	Additive Manufacturing Expert
Intense enablement and organizational setup for an innovative AM R&D Center within your organisation	On your site	Access to EOS know-how and expertise	Additive Manufacturing Expert

Global Innovation Center at EOS HQ:

Holistic enablement of serial production

Regional Innovation Lab:

Holistic enablement of serial production

On-site Centre of Excellence :

Implementation of an AM Centre of Excellence

Take the shortcut to AM excellence in your organisation:

Promoting on-going excellence in AM

Our Academy

The best way to ensure a successful AM programme is to build up and maintain the necessary know-how and expertise. Additive Minds makes it possible to do just that with our extensive Training Portfolio. It includes everything you need to drive innovations with AM: one-day trainings to a six-month educational programme.

Consultative trainings, seminars and workshops:

- Take advantage of our interactive programmes, designed to transfer know-how as fast as possible.
- Customer specific trainings
- Hands on and "Edutainment" trainings
- Get tangible results within a few days
- Choose from a variety of levels: beginners, advanced and expert courses
- Range includes everything from Design Trainings to Software and Quality courses

Education Programmes:

Make the most of your AM System by becoming an expert in your AM field.

- Comprehensive knowledge transfer from leading experts at EOS and leading universities guarantees rapid development of AM expertise
- Balanced programme transfers both know-how and practical experience

Your Benefits:

- Defined and proven concept on how to develop engineers
- Fast know-how development enabled by EOS and our highly skilled Partner Network, which includes the University of Wolverhampton and SRH Hochschule Berlin
- 2 weeks theory followed by 1 month implementation: Highly effective way of transferring theoretical know-how into real life
- Highly scalable and repeatable, by transferring the ability to implement knowledge within your company and across functions
- Save time and money, compared to conventional "trial & error" learning
- Achieve momentum of AM implementation to unlock the full potential of your employees
